Subject: Energy in Denial Video Series Number 1 : ""FROM THE FRONTLINES" Wyalusing Silica Sand Transfer Station"

Hello Friends, This is the first video in a series to expose the " Problems " with Gas Drilling, We call it " Energy In Denial ". A Very special Thank you to Jay Wilcox for producing these films to expose this Dirty and Unsafe practice. What are You willing to do to Protect Your Family and Communities from this Man Made Unnatural Disaster ? " The Only Thing Necessary For The Triumph Of Evil, Is For Good Men To Do Nothing ". Sir Edmund Burke. Please go see Promised Land coming out next week that shows the process of " Fracturing " Our Communities.

"FROM THE FRONTLINES" Wyalusing Silica Sand Transfer Station
by urbandisasterrecords

Wyalusing Pa, Silica Sand is used as a proppant in the hydraulic fracturing process. The health problems associated with silica sand include silicosis, which is a fatal disease.

This video shows the callous disregard for the safety of children who are exposed to the dust from the railroad silica sand transfer station located near the local public schools and next to a daycare center.

For more info from the gasfields or to donate to the water fund for the people of Dimock, PA, contact Craig Stevens at 570-967-2280 or email at clscraigstevens@earthlink.net
